Map Viewer

Browse GeoPlatform.gov data assets to find geospatial data. Build a custom map. Add your own data to the map. Share the map with others.

Why should I join?

GeoPlatform users have access to:

- A one-stop shop that delivers trusted, data and services.

- Authoritative data to support informed decision making.

- Applications and services for governmental and nongovernmental use.

- A shared infrastructure that hosts data and applications.

- A focal point where governmental, academic, private, and public data can be visualized together to inform national, regional, state, county, and local issues.

Ask Us

Census Bureau and the National Boundaries Group.

The Census Bureau is the Federal Geographic Data Committee's (FGDC's) Theme Lead Agency for the Governmental Units, Administrative and Statistical Boundaries Theme. The National Boundaries Group (NBG) and subgroups (Federal Lands Workgroup, Tribal Boundaries Workgroup) function as cross-agency workgroups with members from multiple federal agencies. The NBG represents stakeholders from tribal, federal, state, local, and private organizations, and explores boundary issues that crosscut or are pertinent to multiple National Geospatial Data Asset (NGDA) Theme Communities. To join the **Community Pages** for the NBG and its subgroups, please follow the instructions outlined in this brochure..
